

Computational Neuroscience

Mohamed Abdelhack

Postdoctoral Fellow

Krembil Centre for Neuroinformatics

9-April-2022

**ARABS IN
NEUROSCIENCE**

Outline

- Personal journey into comp neuro
- How modelling can help (Marr's levels of analysis)
- Imaging/Modelling different scales of neuronal structures
- Examples of advances in the field
 - Handwriting BCI
 - Visual reconstruction of images
 - Robotic arm movement
- Career prospects?
- Required knowledge to enter the field

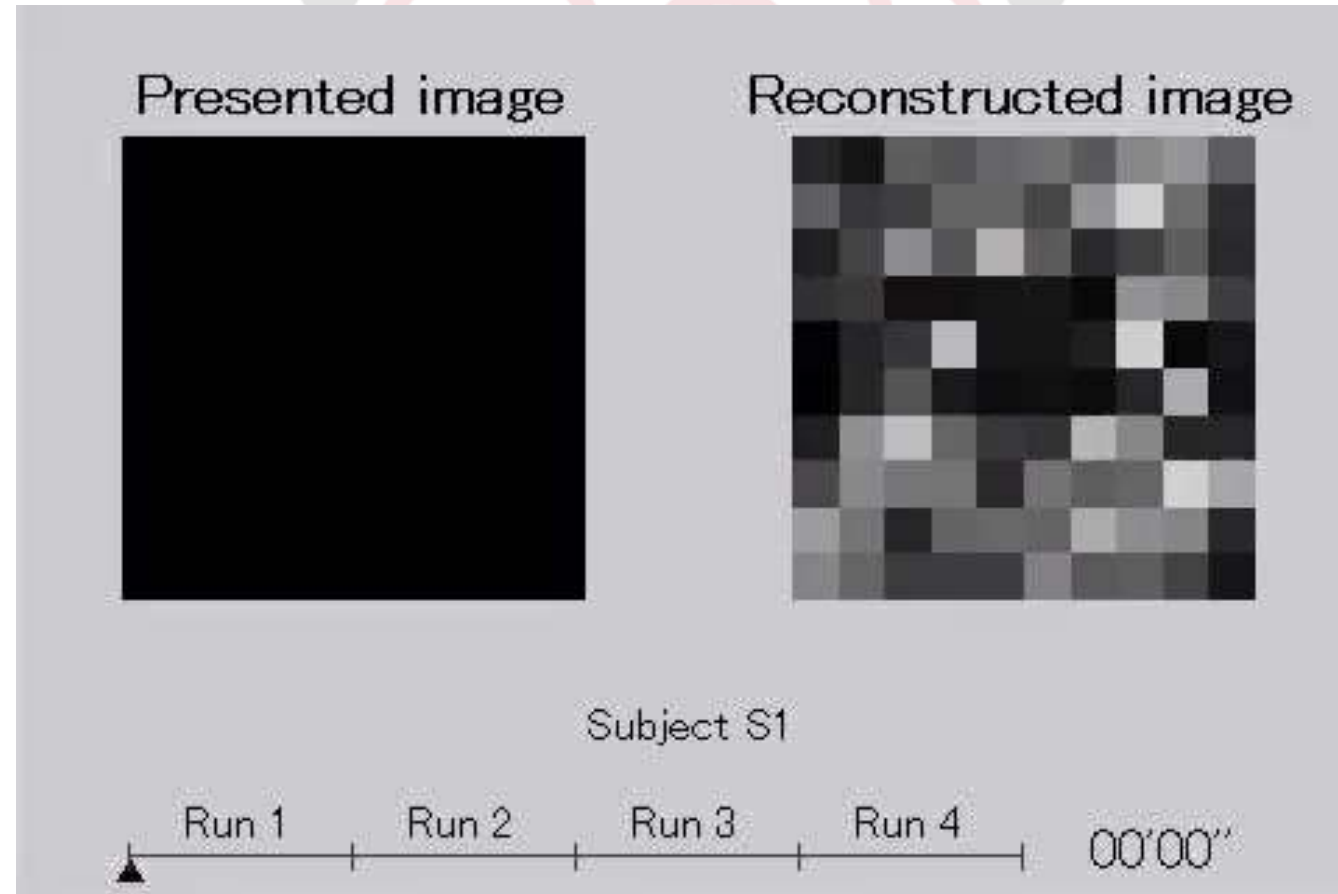

My story with Neuroscience

لما تعمل تجربة مفروض تتعمل في المعمل في البيت

From BCI to Comp-Neuro

So What is computational neuroscience?!

So What is computational neuroscience?!

That's actually neuro-tech, a small part of computational neuroscience

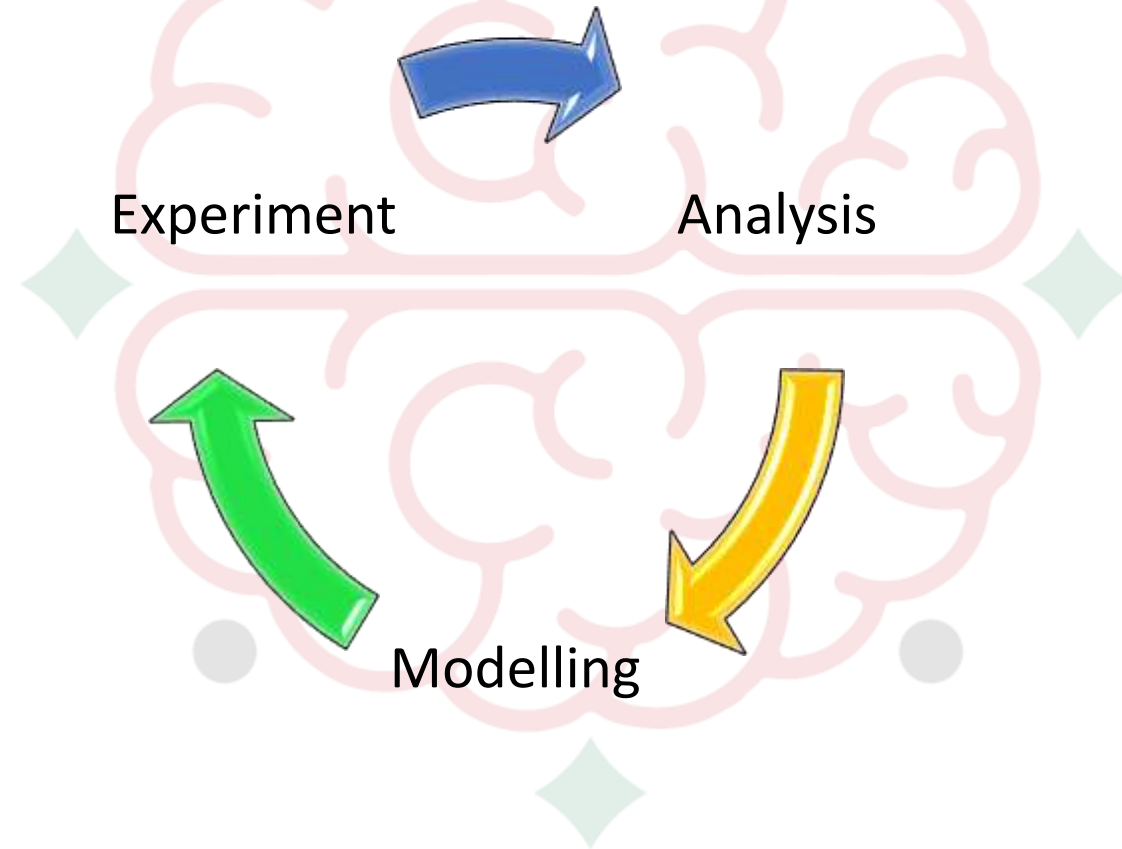

So What is computational neuroscience **actually**?!

Theoretical analysis and computational modeling are important tools for characterizing **what** nervous systems do, determining **how** they function, and understanding **why** they operate in particular ways. (Dayan and Abbott 2001).

- Descriptive (What?)
- Mechanistic (How?)
- Interpretive (Why?)

Experimental modelling cycle

Why neural modelling?

- Guide new experiments
- Understand the underlying mechanisms giving rise to experimental data
- Aggregate experimental data into a compact form
- Understand reasons for neurological/mental illness
- Predict the effect of medications
- Devise new brain-inspired technologies

Marr's Levels of Analysis (Marr 1982)

- What does the system do and why?
- How does the system do what it does?
- How is the system physically realized?

Computational

Algorithmic

Implementation

All models are wrong some are useful

Models simplify the real phenomena into artificial but nonetheless useful entities/processes.

Causality

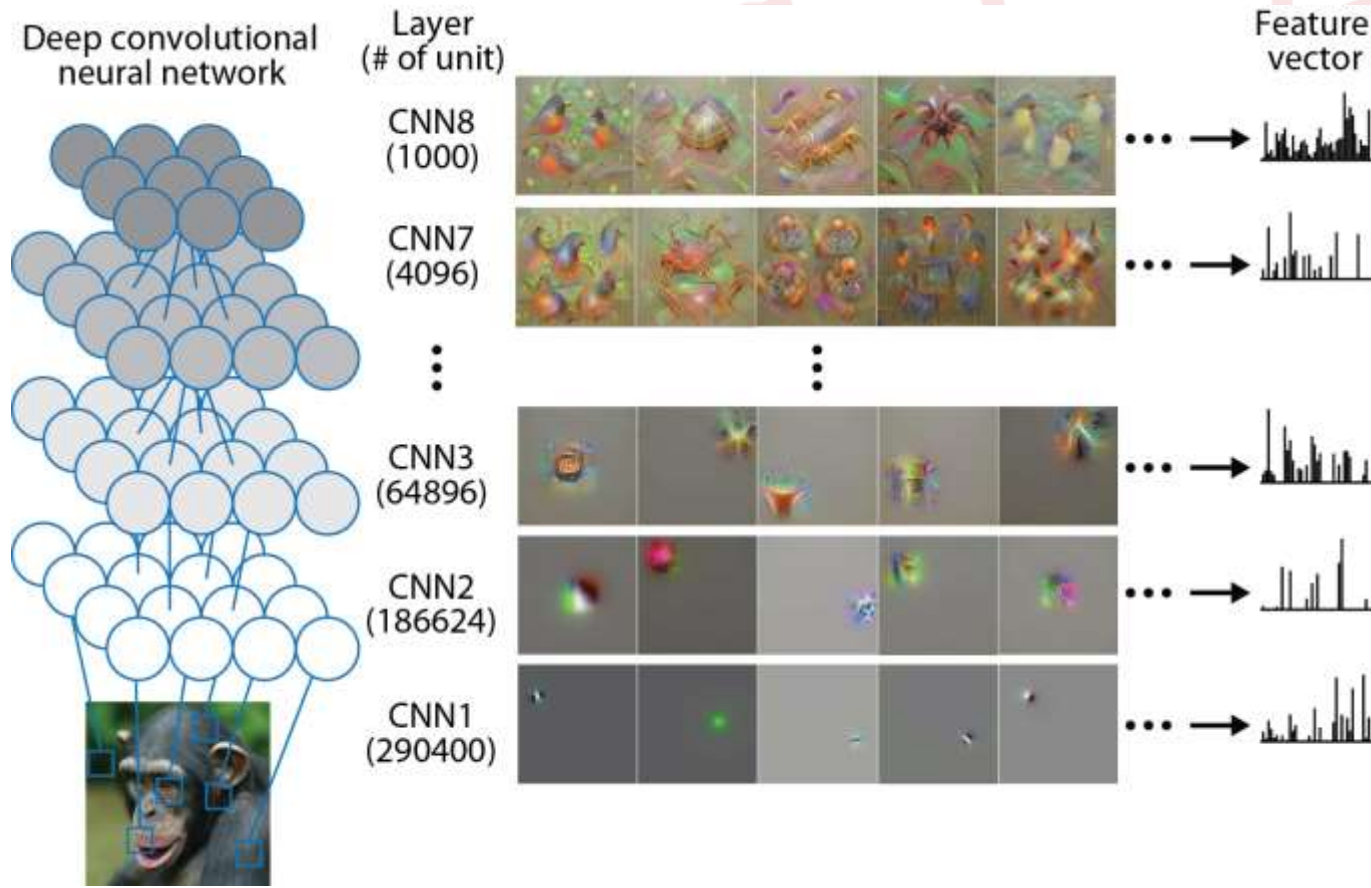

Control Theory

Embedded Systems

Dynamic Networks

Engineering

Example: Deep Neural Networks are good models of vision

Papers about similarity between brain and DNN

- Cadieu et al., 2014
- Khaligh-Razavi and Kriegeskorte, 2014
- Yamins et al., 2014
- Güçlü and van Gerven, 2015

Brain-Score

Leaderboard About Compare Participate

Brain Rank	Model	Brain-Score	V1: Your data here!	V2: Your data here!	V4: @carho Magaj2015	IT: @carho Magaj2015	Behavior: @carho Magaj2015	Classification: @magaj2015
	Max	549		872	808	389	82.9	
1	densenet-169 Huang et al., 2016	549		863	808	378	75.9	
2	cornet_a Kubilius et al., 2018	544		850	800	382	74.7	
3	resnet-101_v2 He et al., 2015	542		853	885	390	77.4	

But they fail when images are blurred

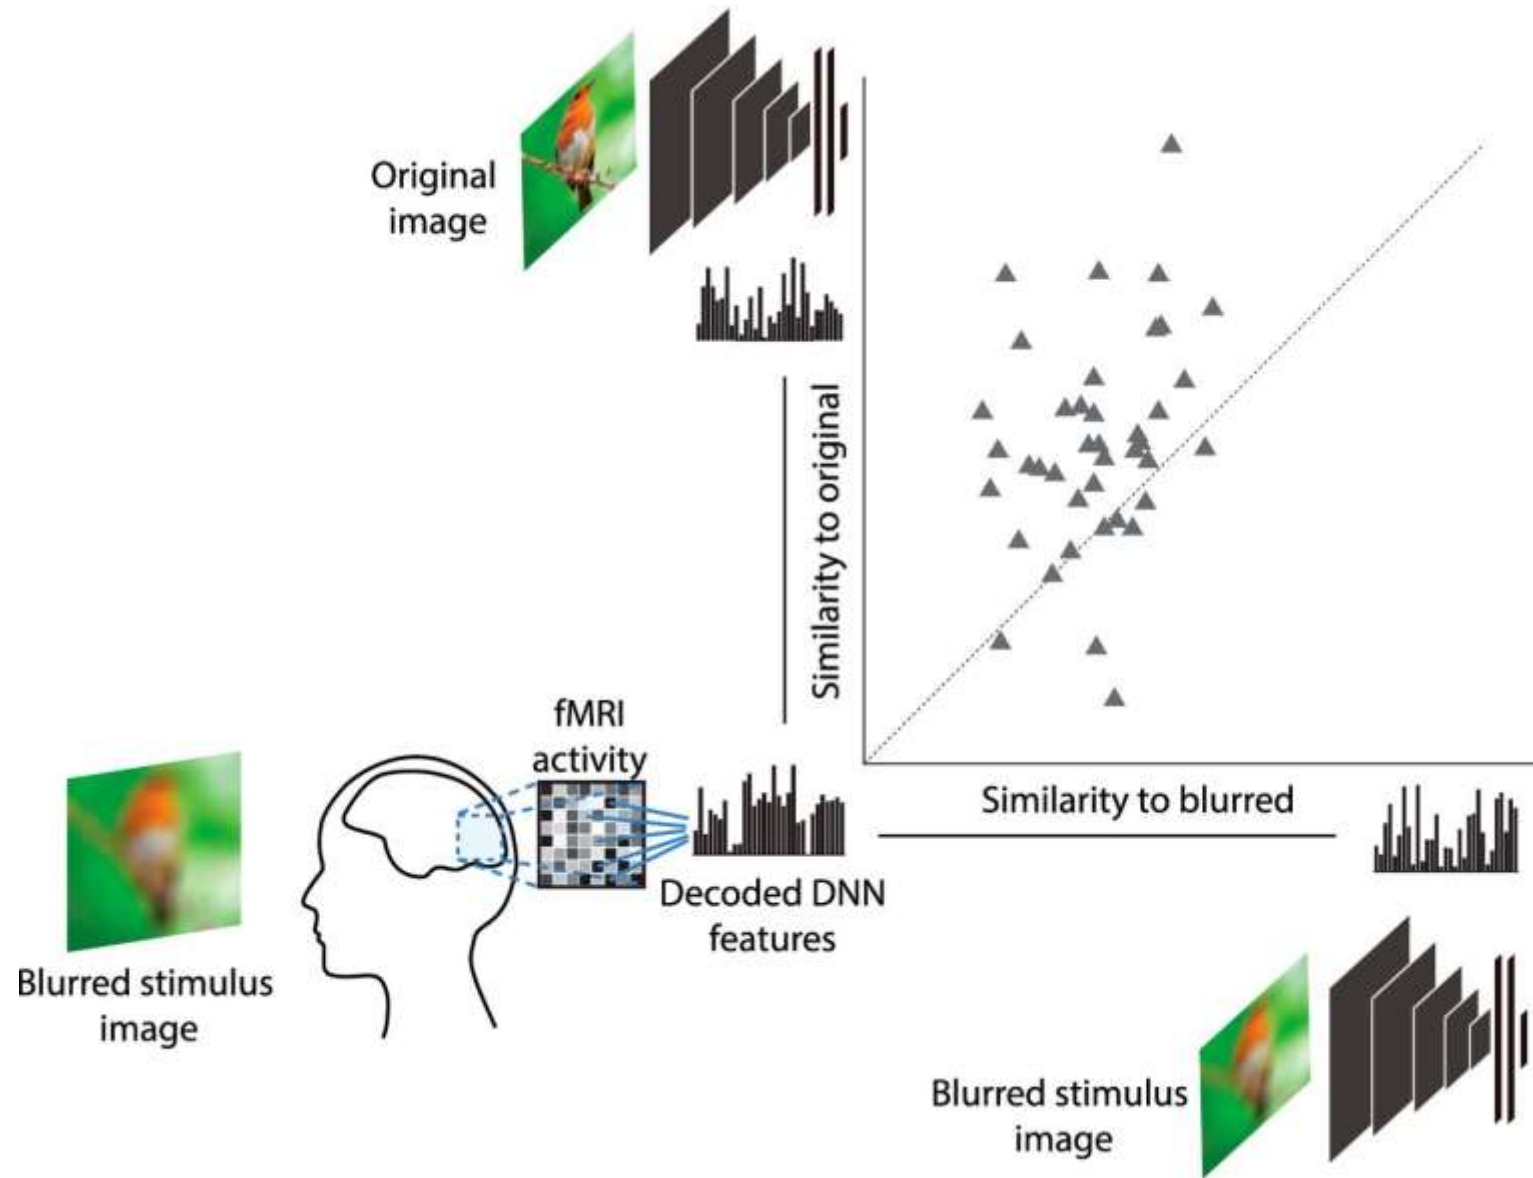

Human vision robustness

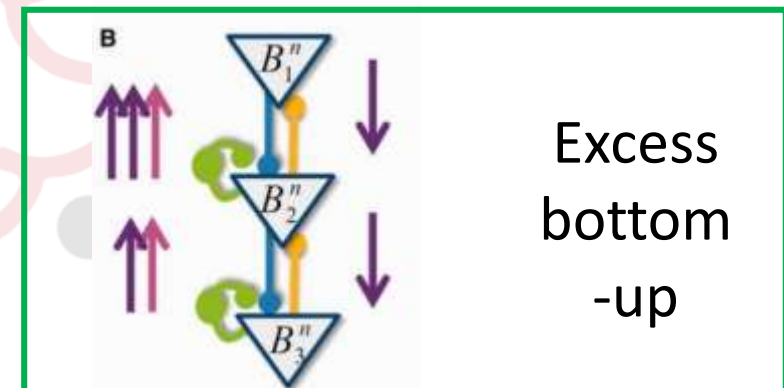

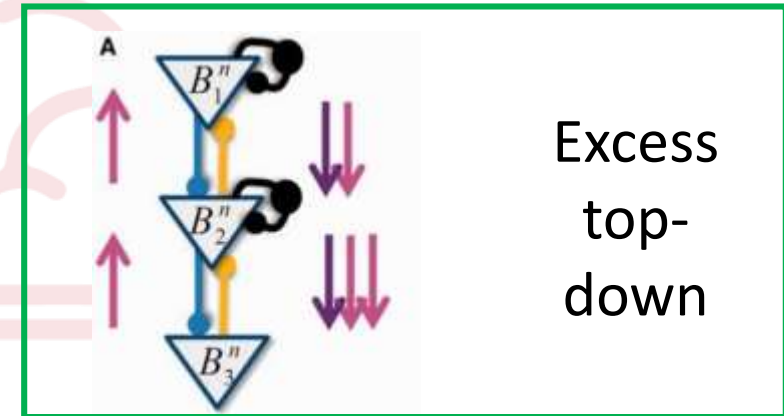

What do we already know?

Application in mental health

Career Prospects?

- Academic (most options)
- Industry
 - Brain Computer Interfacing
 - Non-invasive (Emotiv, Kernel, Next Mind... etc)
 - Invasive (Neuralink??)
 - Peripheral nervous system (Facebook Reality Labs)
 - Brain-inspired AI development (DeepMind)
 - Medical AI (Mental health and Neurology)

emotivo
you think, therefore, you can

How to dive into comp neuro?

Background

- Calculus: differential equations, integration
- Statistics: Probability distribution, Bayes law, hypothesis testing
- Programming: Python (preferred), MATLAB (if you already know it)
- Linear Algebra: Matrix operations, Eigen decomposition
- Neuroscience: Basic understanding of brain anatomy and function
- Machine Learning: Regression, Deep Learning (optional)

How to dive into comp neuro?

- Book: Fundamentals of Computational Neuroscience – Trappenberg
- Online courses: Neuromatch Academy (academy.neuromatch.io)
APPLICATIONS NOW OPEN!
- Data to work on:
 - <https://openneuro.org/>
 - <http://brainliner.jp/>
 - <http://neuromorpho.org/>

Example code: Just check a paper you are interested in, they usually release the code on Github

Conference: Neuromatch Conference (ONLINE), COSYNE, MAIN

Hackathons

- <https://brainhack.org/>
- <https://www.br41n.io/>

OpenNEURO

Arabs in Neuroscience Initiative

We started this initiative in 2020 as a networking group.

We went public only a month ago:

- Twitter [@ArabsInNeuro](https://twitter.com/ArabsInNeuro)
- Instagram [@arabsineuro](https://www.instagram.com/arabsineuro)

We are offering and Intro into Computational Neuroscience online course

Intro into Computational Neuroscience Course

Crash course teaching preliminary knowledge necessary for entering the field of computational neuroscience with hands-on exercises (June 13-24)

Instructors:

- Samar ElSheikh (Krembil Centre for Neuroinformatics)
- Rawan Elsubaie (Sainsbury Wellcome Centre)
- Moataz Assem (University of Cambridge)
- Ramzi Halabi (Krembil Centre for Neuroinformatics)
- Yahia Ali (Georgia Tech)
- Mohamed Abdelhack (Krembil Centre for Neuroinformatics)
